

**Cochrane  
TaskExchange**

# A bigger team than you think

**Connect with the global evidence community  
to get reviews done more quickly**

## People are Cochrane's greatest asset

The best way for us to improve the quality of Cochrane Reviews is to bring these people together.

To make it easier for us to find each other and work together.

TaskExchange connects people who need help with their Cochrane Reviews with people who have the time and expertise to help.

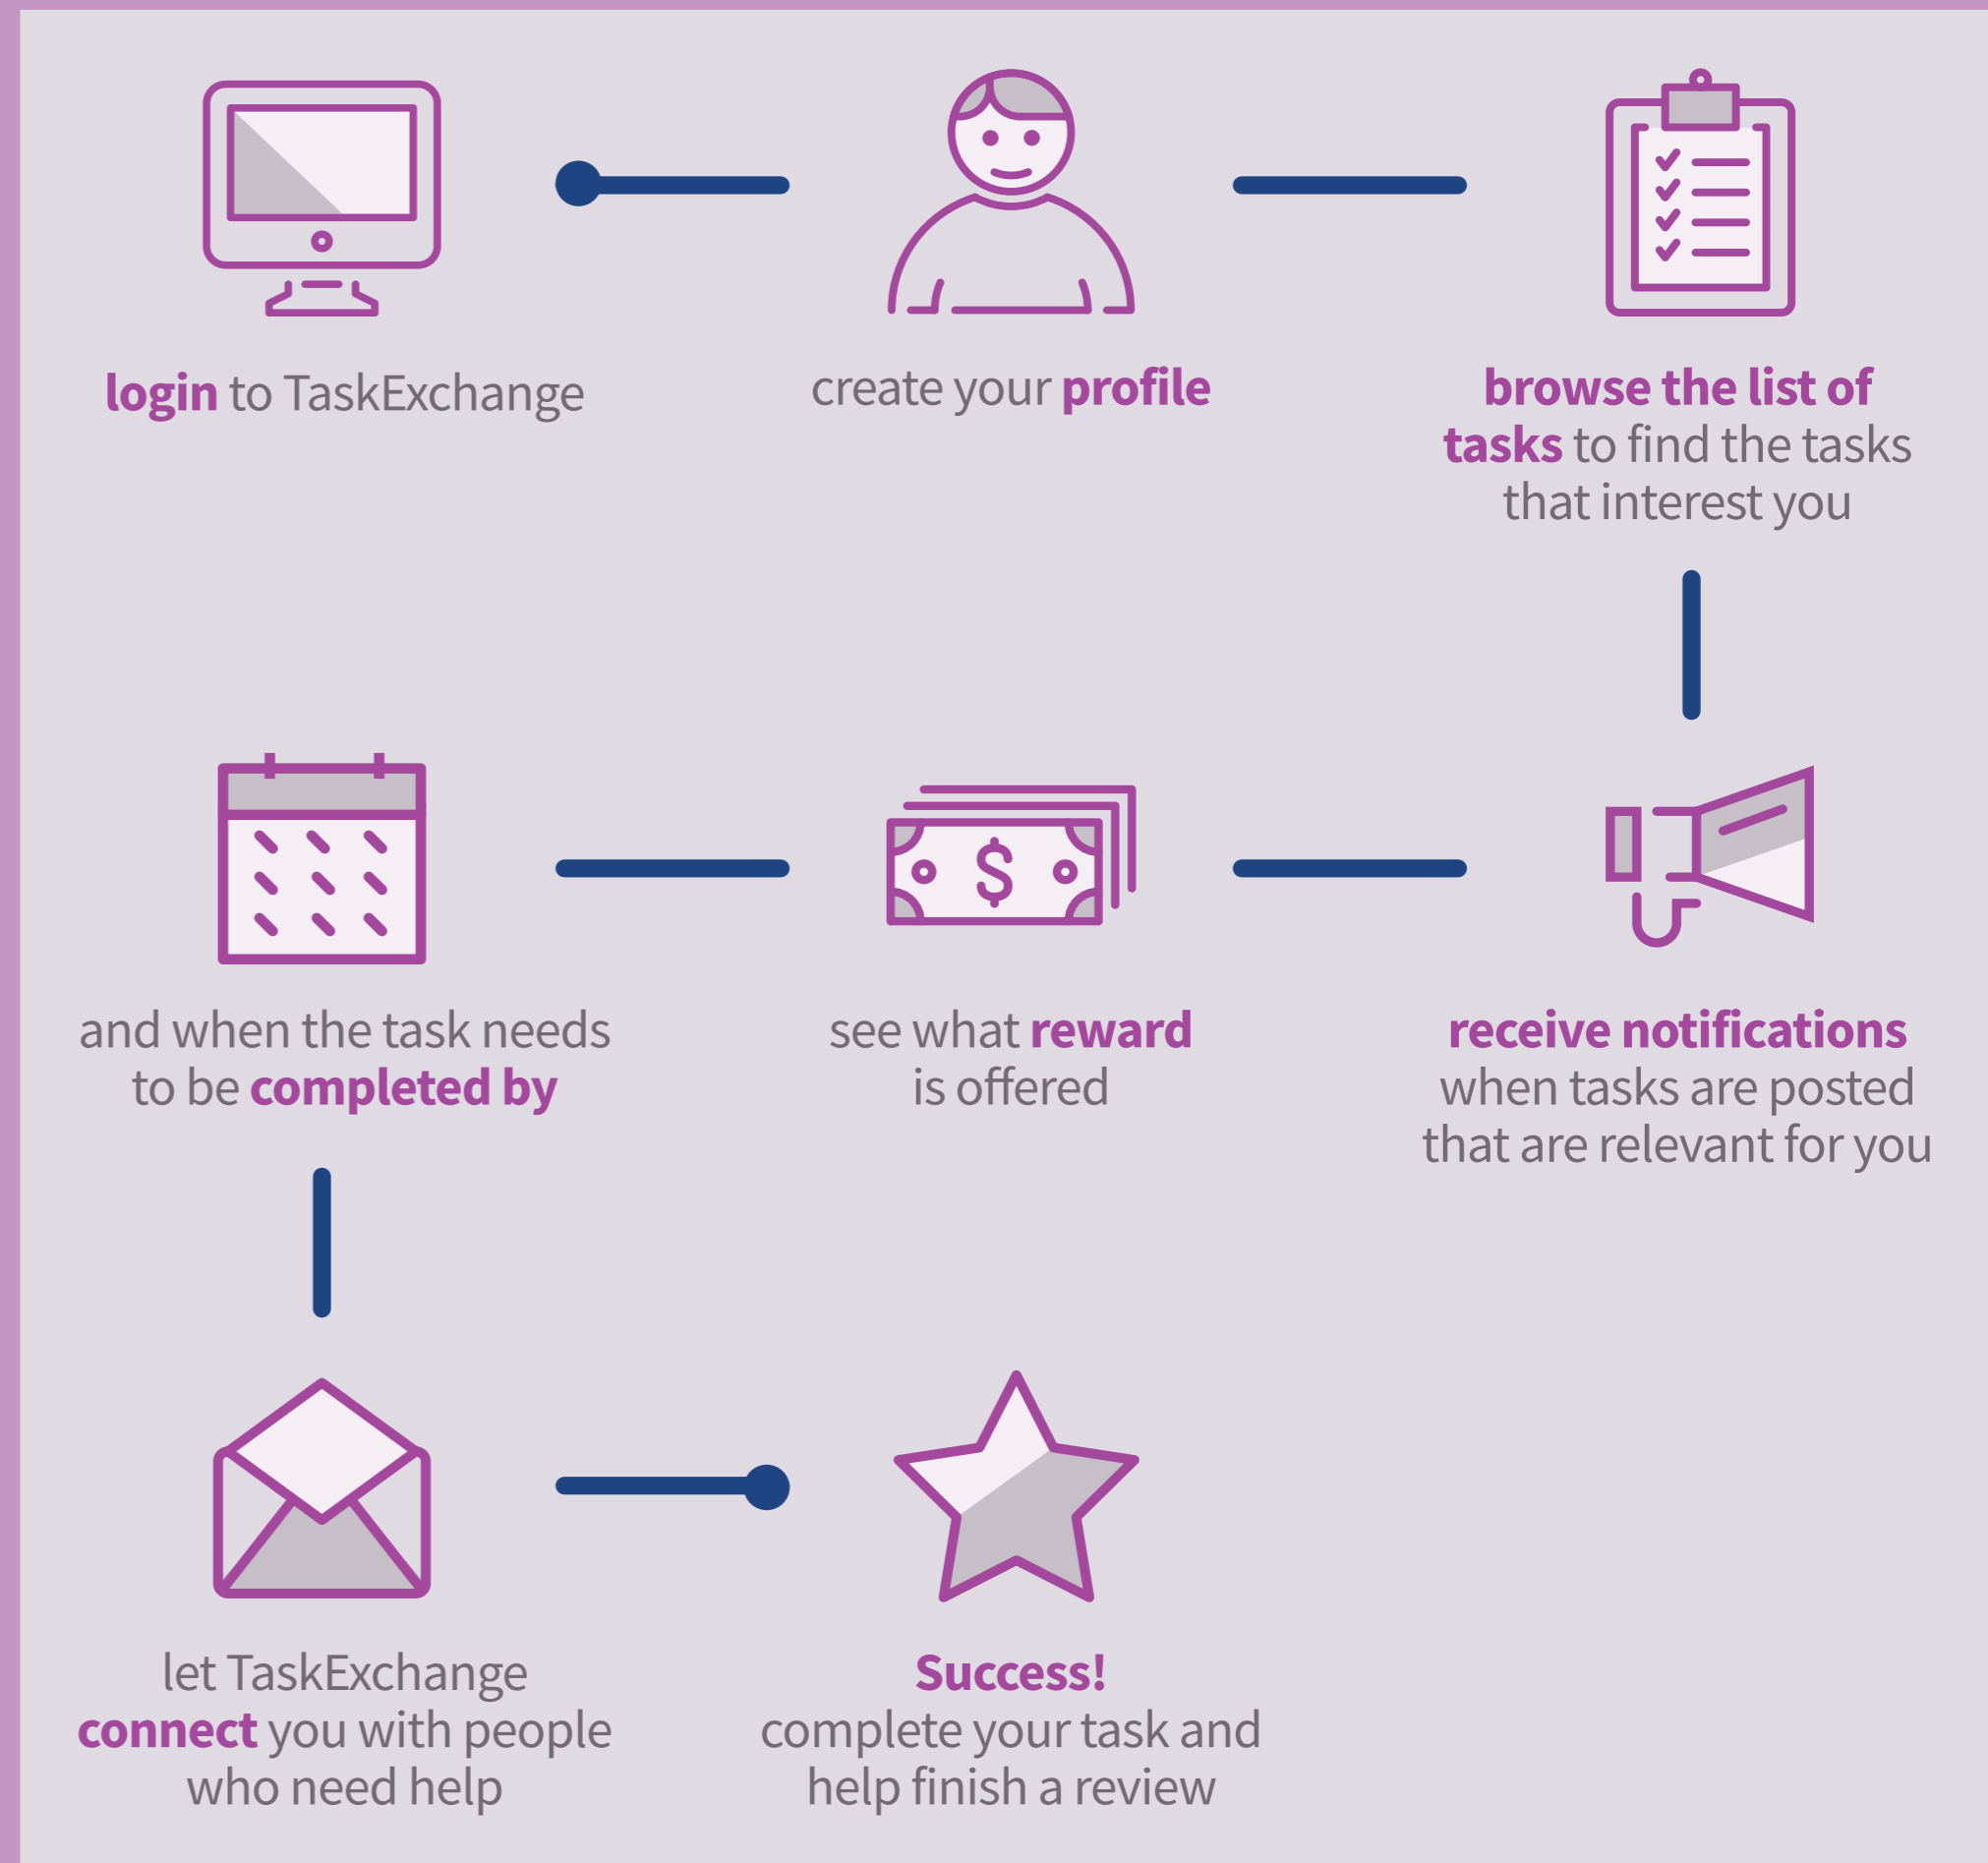

## Get help

Get the help you need to get your review done more quickly

## Help out

Because it should be easy to help out on a review

## How does TaskExchange benefit Cochrane?

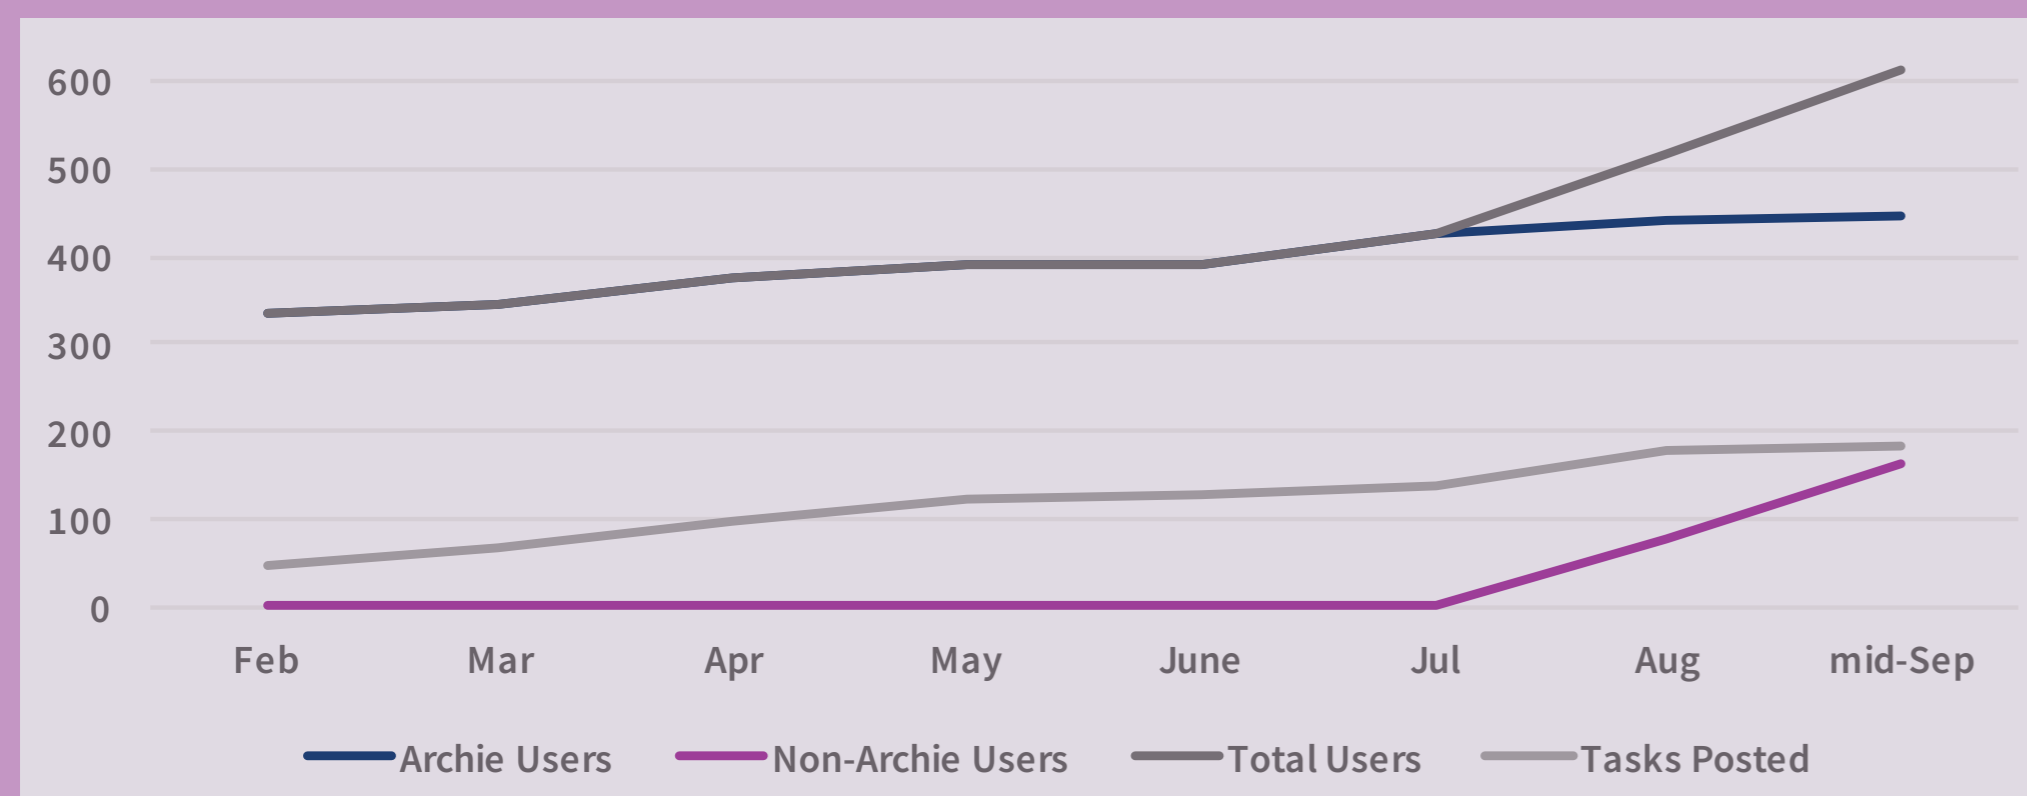

Doing a Cochrane Review is an important, substantial, and sometimes overwhelming job. At some stage author teams can get stuck with a review task that's bigger than expected, or with an element of a review that they don't have the skills to complete. By bringing Cochrane Community members who need help together with those who can help, this is how TaskExchange benefits everyone:

- improves the efficiency by which Cochrane contributors can find others to help
- better utilizes the global evidence community in the production of our reviews
- helps us do better reviews more quickly

## How can TaskExchange help with your review?

## TaskExchange since launch:
