Entering and citing references

In this section:

References in Cochrane Reviews

References are divided into two groups: 1) references to studies; and 2) other references. The references to studies comprise included, excluded, and ongoing studies as well as studies awaiting classification. The other references comprise additional references (e.g. those used in the background or discussion sections) and references to other published versions of the review (including the protocol).

Each study has a Study ID (usually made up of the last name of the first author plus the year) used to refer and link to the study within the review. Each study has one or more references. Other references have Reference IDs (usually made up of the last name of the first author plus the year).

Entering references

Reference fields

When references are entered manually in Review Manager 5 (RevMan 5), different reference fields need to be completed (e.g. author(s), title, journal, page numbers etc.). For guidance on content and presentation of the different reference fields, see the [Reference fields](#) section. Note that text formatting is applied to references entered in RevMan 5 during the publishing process; for example, journal titles and book titles are converted to italic text on publication.

Reference types

References can be typed in manually or imported from files generated by standard bibliographic software (see [RevMan 5 User Guide](#)) or from the Cochrane Register of Studies. It is preferable to use the importing method. Different types of references can be entered into RevMan 5. See [Overview of reference types](#).

For detailed examples of reference types and how to populate reference fields, see the [Reference types](#) section. If a reference does not fit into one of the available categories, select 'Other' and use the available fields in a way that gives an appropriately formatted reference. You can also refer to [Citing Medicine](#), the National Library of Medicine's guide for citing references, for other reference types, such as a patents, legal material, or journal articles with a retraction, comment, or erratum. See also [Differences between Cochrane and NLM style](#).

Citing references

This table provides guidance on inserting references in the text in Cochrane Reviews. The study and reference IDs must be linked to the reference list.

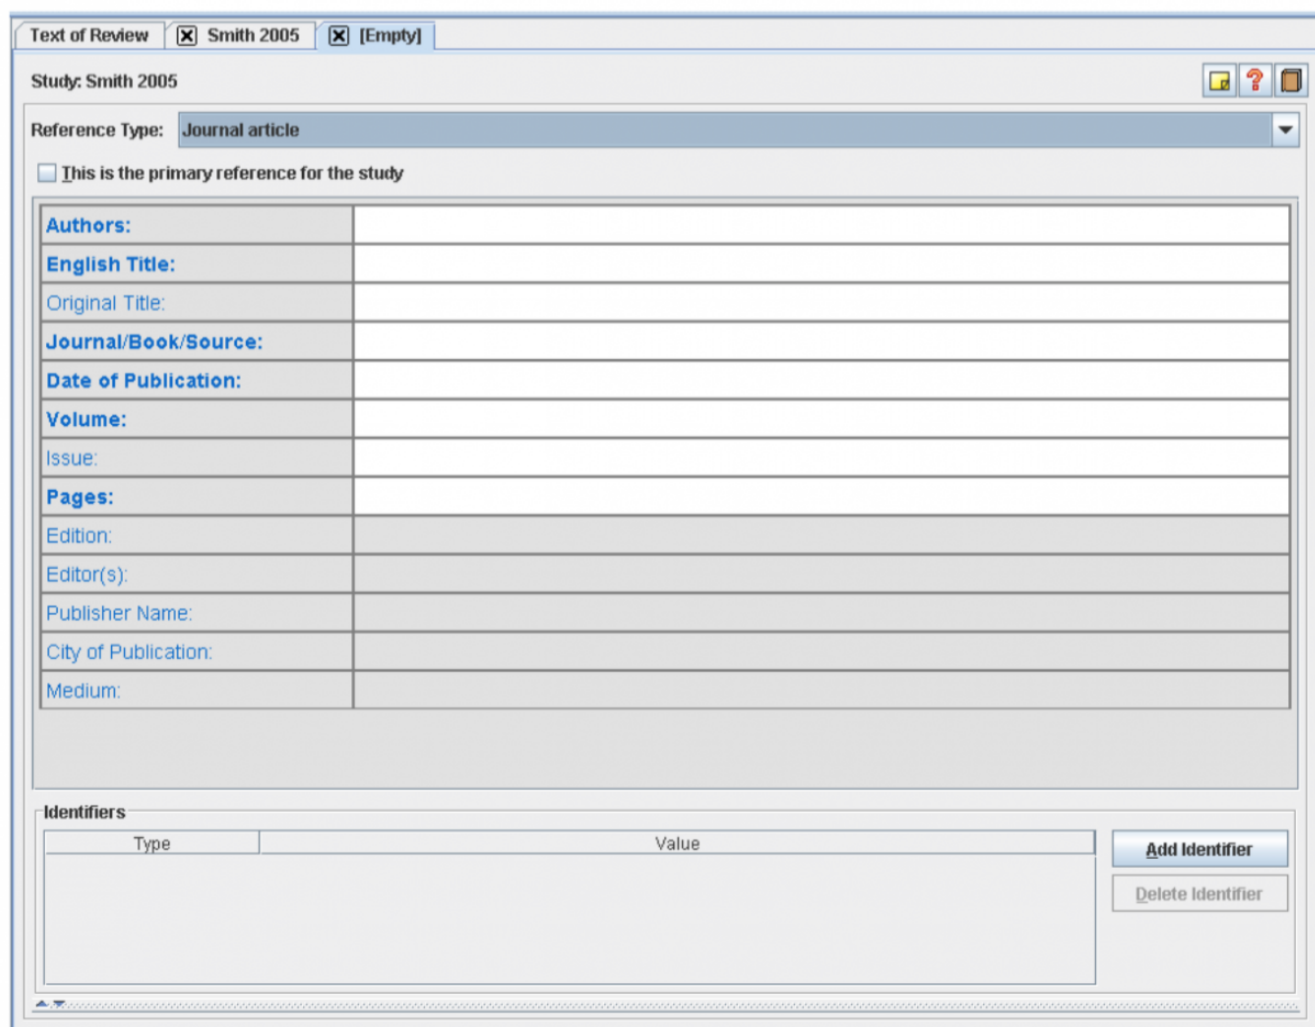

| Guidance | Correct | Incorrect |
|--|--|--|
| Separate multiple citations with a semicolon. | (Smith 2000; Robb 2001) | (Smith 2000, Robb 2001) |
| List in alphabetical or chronological order (from earliest to latest), and be consistent within a single document. | Alphabetical: (Bakri 1988a; Bakri 1988b; Davis 2003; Slinn 2001) | Alphabetical: (Bakri 1988a; Bakri 1988b; Slinn 2001; Davis 2003) |
| | Chronological: (Bakri 1988a; Bakri 1988b; Davis 2003; Slinn 2001) | Chronological: (Bakri 1988a; Bakri 1988b; Slinn 2001; Davis 2003) |

| | | |
|---|---|---|
| | 1988b; Slinn 2001; Davis 2003) | Davis 2003; Slinn 2001) |
| No 'and' before the final citation | (Davis 2001; Omari 1988; Preston 1988; Slinn 2001) | (Davis 2001; Omari 1988; Preston 1988; and Slinn 2001) |
| Citations can be used as part of a sentence or placed in round brackets within the closest punctuation. Note: see below for single sentences containing multiple pieces of information | The study was successful (Robeson 1990). | The study was successful [Robeson 1990]. |
| | The study was successful (Griffin 1990); it confirmed previous findings (Howes 1995). | The study (Griffin 1990) was successful; it confirmed previous findings (Howes 1995). |
| | Williams 1991 reports the full details. | (Williams 1991) reports the full details. |
| Sentences that include multiple pieces of information supported by a number of citations should be structured so that it is clear to which piece of information each citation refers. | Smith 1990 included women only, while Jones 1999 included men only. or: One trial included women only (Smith 1990), while another included men only (Jones 1999). | One trial (Smith 1990) included women only, while another (Jones 1999) included men only. |
| Rephrase to avoid using 'et al.' in the text. | Boddy and colleagues wrote that... The Boddy study mentions... | Boddy et al. wrote that... |

Reference fields

References need to be entered into Review Manager 5 (RevMan 5) using the designated fields (see Figure 1). Different reference types, such as journal articles and books, need information in different fields.

Figure 1 Screenshot of Review Manager 5 reference fields

The table below has guidance on the correct way of entering information into the various reference fields in RevMan 5. RevMan 5 automatically inserts punctuation at the appropriate locations in the formatted reference, so ensure that there is no full stop at the end of each reference field.

| Field | Guidance | Correct | Incorrect |
|--------------------------|---|-------------------------------|---|
| Study ID or Reference ID | Generally, preferred Cochrane format uses family name of first author and year of publication Alternatively, if a trial is more widely known by an acronym, authors can use the format 'TRIALNAME YYYY'; use the year of publication of the primary reference for the trial. | Garner 2001 WOMAN 2017 | — |
| | Two or more articles from the same author from the same year | Bushell 2000a, Bushell 2000b | Bushell 2000 a, Bushell 2000 b, (space between year and letter) |

| Field | Guidance | Correct | Incorrect |
|---------------------------------|--|---|--|
| | | | Bushell 2000, Bushell 2000a, (no letter with year) |
| Authors | List the first six authors before using 'et al'; precede 'et al' by a comma Note: when entering authors in the Cochrane Register of Studies (CRS) all authors should be listed when possible. | Smith H, Tavender E, Klaes D, Hinds P, Remmington T, Sparkes V, et al | — |
| | No 'and' before the final | Smith H, Tavender E, Klaes D, Hinds P | Smith H, Tavender E, Klaes D, and Hinds P |
| | Authors' names should be written with the family name first, followed by a maximum of two initials. The family name should be followed by one space and a maximum of two initials. There should be no full stops or spaces between initials, though they may be hyphenated where appropriate. Given names should not appear in full, but be restricted to an initial. Authors should be separated by a comma. It is particularly important to ensure that author data is entered accurately, as the author data is automatically processed by organisations that receive Cochrane content at publication. Note: see 'Family names' in the section on Names for advice about Dutch and Chinese names, and designations of rank. | Schoenfeld KT, Belfield S, Miller PD | Schoenfeld KTM, Belfield Sean, Miller, P. D. |
| English title (journal article) | Sentence case: first letter of the first word in upper case; other words in lower case unless they are proper nouns or require an upper-case letter If the title includes a colon, the word after the colon should start with a lower-case letter unless it is a proper noun or requires an upper-case letter (e.g. Epidemiology: Scotland a suitable microcosm?). Do not use italics. | Antibiotics for treating infection The importance of vitamin A Implementing GRADE Vitamin D for preventing cancer: evidence and health beliefs Staphylococcus aureus infection control in clinics | Antibiotics For Treating Infection The importance of vitamin a Implementing Grade Vitamin D for preventing cancer: Evidence and health beliefs <i>Staphylococcus aureus</i> infection control in clinics |

| Field | Guidance | Correct | Incorrect |
|--------------------------------------|---|---|--|
| English title (book or dissertation) | <p>Write in full using title case (i.e. each substantive word starts with an upper-case letter).</p> <p>Note: titles of book chapters should be written in sentence case (i.e. first letter of the first word in upper case; other words in lower case unless they are proper nouns or require an upper-case letter).</p> <p>Do not use italics.</p> | <p>Sports Injuries and Their Treatment</p> <p>Staphylococcus aureus</p> | <p>Sports injuries and their treatment</p> <p><i>Staphylococcus aureus</i></p> |
| Original title | Include non-English title only if provided by the journal or database | — | — |
| Journal title | <p>Write in full using title case (i.e. each substantive word starts with an upper-case letter). Follow Style Manual guidance rather than stylings proposed by the journals or its publisher. Select titles from the journal pick list.</p> <p>Note: enter journal names in regular text in the References section of RevMan 5, as they are italicized automatically when the review is published (however, in the text of the review they should be input in italics).</p> | <p>Journal of Pharmacy and Pharmacology</p> <p>PLOS One</p> | <p>J Pharm Pharmacol</p> <p>PLOS ONE</p> <p>PLos One</p> |
| | <p>Do not include 'The' at the start of journal names.</p> <p>Journal titles sometimes change; use the title current at the time of publication (e.g. <i>British Medical Journal</i> changed to <i>BMJ</i> in 1988, then to <i>The BMJ</i> in 2014, although both <i>BMJ</i> and <i>The BMJ</i> are entered as 'BMJ').</p> | <p>Lancet</p> <p>Journal of Physiology</p> | <p>The Lancet</p> <p>The Journal of Physiology</p> |
| | <p>For non-English language journal titles, include an English translation in square brackets after the original title only if the translation is provided by the journal or database.</p> | <p>Zhonghua Yi Xue Za Zhi [Chinese Medical Journal]</p> | <p>Zhonghua Yi Xue Za Zhi (Chinese Medical Journal)</p> |
| Issue number | Complete for all reference types when available. | — | — |
| Page numbers | See examples. | 324-8, 556-60, 1093-8 | 324-28, 556-560, 1093-1098, |

| Field | Guidance | Correct | Incorrect |
|--------------------------|---|------------------------------------|---|
| | | | and 1093-98 |
| Identifiers | <p>Use of identifiers is optional (they may aid identification of the reference and allow a hyperlink from the reference to the article).</p> <p>Note: identifiers are not automatically included in the reference field slots provided in RevMan 5. When entering an identifier, authors must click on the 'Add Identifier' button below the reference fields input table and select the type of identifier wanted (i.e. MEDLINE, PubMed, Embase, DOI, Central, or Other).</p> | — | — |
| DOI (type of identifier) | Include where provided | 10.1002/14651858. CD004577.pub2 | DOI: 10.1002/14651858. CD004577.pub2 |

| Journal/book/source | BMJ |
| Date of publication | 2004 |
| Volume | 328 |
| Issue | |
| Pages | 1490-4 |

No named author

Example: Naltrexone: new preparation. Transient preventive efficacy on alcoholic relapse. Prescrire International 1999;8(39):9-11.

| | |
|---------------------|---|
| Reference type | Other |
| English title | Naltrexone: new preparation. Transient preventive efficacy on alcoholic relapse |
| Journal/book/source | Prescrire International |
| Date of publication | 1999 |
| Volume | 8 |
| Issue | 39 |
| Pages | 9-11 |

Not in English

Example: Abadie V, Depondt E, Bresson JL, Vidailhet M. Recommended dietary allowances for pregnant women affected with phenylketonuria [Recommandations diététiques pour les femmes enceintes atteintes de phénylcétonurie]. Archives de Pédiatrie 2001;8(4):397-406.

| | |
|----------------|---|
| Reference type | Journal article |
| Authors | Abadie V, Depondt E, Bresson JL, Vidailhet M |
| English title | Recommended dietary allowances for pregnant women |

| | |
|----------------------------|---|
| | affected with phenylketonuria Note: leave this section blank if an English translation is not available. Note: do not include the language of the original article at the end of the title. |
| Original title | Recommandations diététiques pour les femmes enceintes atteintes de phénylcétonurie |
| Journal/book/source | Archives de Pédiatrie |
| Date of publication | 2001 |
| Volume | 8 |
| Issue | 4 |
| Pages | 397-406 |

NOTE: for references in languages that use a non-Latin alphabet, e.g. Chinese or Russian, all fields must be completed in Romanized transliteration and not in the original script, as in the example below.

Example: Jia CL, Jiang GS, Yang XX, Dou HQ, Li CR. Effects on Helicobacter pylori reinfection in gastric mucosa by two oral plaque control methods. Huaxi Kongqiang Yixue Zazhi [West China Journal of Stomatology] 2009;27(2):172-4.

| Volume | 20 |
| Issue | 2 Pt 1 |
| Pages | 257-60 |

In issue with no volume

Example: Panjwani U, Selvamurthy W, Singh SH, Gupta HL, Thakur L, Rai UC. Effect of Sahaja yoga practice on seizure control & EEG changes in patients of epilepsy. Indian Journal of Medical Research 1996;(103):165-72.

| | |
|----------------------------|---|
| Reference type | Journal article |
| Authors | Panjwani U, Selvamurthy W, Singh SH, Gupta HL, Thakur L, Rai UC |
| English title | Effect of Sahaja yoga practice on seizure control & EEG changes in patients of epilepsy |
| Journal/book/source | Indian Journal of Medical Research |
| Date of publication | 1996 |
| Volume | (103) |
| Pages | 165-72 |

In press or submitted to a journal

Articles that have been accepted for publication can be cited as 'in press' articles. Articles that have been submitted to a journal, but not yet accepted for publication, must not be cited in that form. Instead they are cited as unpublished data.

Example: Johnson AB, Smith CD. A review of treatments for chronic disorders. Journal of Medicine (in press).

| | |
|----------------------------|--|
| Reference type | Other |
| Authors | Johnson AB, Smith CD |
| English title | A review of treatments for chronic disorders |
| Journal/book/source | Journal of Medicine |
| Date of publication | (in press) |

Electronic publication ahead of print

Example: Feldman RD, Zou GY, Vandervoort MK, Wong CJ, Nelson SA, Feagan BG. A simplified approach to the treatment of uncomplicated hypertension. A cluster randomized, controlled trial. Hypertension 2009 Feb 23 [Epub ahead of print]. [DOI: 10.1161/HYPERTENSIONAHA.108.123455]

| Identifier: DOI | 10.1161/HYPERTENSIONAHA.108.123455 Note: it is highly desirable to have a DOI for e-publications. |

Copublished articles

Some journal articles are published in two or more journals simultaneously, usually to reach a particular audiences or to publicize cross-journal initiatives. If such articles are included as studies, then all references should be added under the study ID. If such articles are additional references, then cite one only of them.

Books, monographs, theses

In this section: [With personal author\(s\)](#) | [With editor\(s\), compiler as author](#) | [With organization as author and publisher](#) | [Chapter in an edited book](#) | [Dissertation or thesis](#)

For books published in the USA or Canada follow the city of publication with the two-letter abbreviation for the state or province. For books published in other countries, follow the city of publication with the name of the country. Use the anglicized form of city names, e.g. 'Vienna' not 'Wien'. For more information about place names see [Citing Medicine: General rules for place of publication](#).

If a book has been assigned an International Standard Book Number (ISBN) that number may be inserted into the 'Other ID' field. Begin with 'ISBN' followed by a space then the number, ignoring all hyphens in the number, e.g. 'ISBN 9780071463898'.

With personal author(s)

Example: Colson JH, Armour WJ. *Sports Injuries and Their Treatment*. 2nd edition. London (UK): Stanley Paul, 1986.

Internet references

When citing a website, consider whether the reference is a 'dynamic' web page that may be updated intermittently or a dated publication posted on a web page. The former type needs an 'accessed' date so that the citation reflects the state of the website at the time it was referred to. The Reference ID in such cases will usually be the year of the access date. For dated publications (e.g. reports) hosted on websites, there is no access date needed, and the Reference ID will include the year of the publication date. See

also: [Scientific or technical reports](#).

General guidance

- When writing the URL, do not include the preceding 'http://' or 'https://'.
- If the date of access is unknown, use '(accessed prior to DD Month YYYY)' using the date on which the review is being edited.
- Keep URLs as short as possible; it is often possible to trim characters from the end. Aim for the simplest version of the url that delivers the page being cited.

Figure, table or appendix in a journal article

Use this format when referencing a figure, table or appendix within a journal article, or when reproducing such material in a Cochrane Review.

Example: Osrin D, Vaidya A, Shrestha Y, Baniya RB, Manandhar DS, Adhikari RK, et al. Effects of antenatal multiple micronutrient supplementation on birthweight and gestational duration in Nepal: double-blind, randomised controlled trial. *Lancet* 2005;365(9463):955-62. Figure, Trial profile; p. 958.

Supplementary materials

Supplementary materials could refer to data or other resources that are published as part of an article (so would have the same authors, date, and underlying source, but would be designated as supplementary material) or could refer to accompanying or linked materials (with different authors, title, date, etc). Therefore, when citing supplementary materials consider whether the materials are presented as part of the main article or as work that has been published independently from the main article.

For supplementary materials that are part of an article, cite the article as usual, but add the section name/number and title of the supplementary materials to the end of the reference. For further guidance and examples, refer to [Citing Medicine: examples of citations to parts of journal articles](#).

For supplementary materials that are independent of the article, locate the primary source for the supplementary material and cite according to the [reference type](#).

Differences between Cochrane and NLM style

In this section: [Overview](#) | [Reference types](#) | [Reference fields](#) | [Formatting differences](#) | [Useful sections in Citing Medicine](#)

Overview

The US National Library of Medicine (NLM)'s [Citing Medicine](#) is a useful resource that covers a wide range of referencing specificities. It is largely compatible with Cochrane style.

For certain [reference types](#), [reference fields](#), and [formatting details](#), Cochrane style differs from *Citing Medicine*, and authors should stick to recommendations in the Cochrane Style Manual. These differences are listed below.

There are some [useful sections in Citing Medicine](#) that may be helpful for handling non-standard reference types or other aspects not specified by the Cochrane Style Manual.

Reference types

Reference types for which authors should follow the Cochrane Style Manual regardless of recommendations from *Citing Medicine*:

- Cochrane documents;
- letters, emails, and personal communication;
- computer programs;
- ongoing studies;
- publications on the Internet.

Reference fields

This table gives details of reference fields for which authors should follow Cochrane Style Manual regardless of recommendations from *Citing Medicine*.

| | Cochrane Style Manual (correct) | <i>Citing Medicine</i> (incorrect) |
|--|---|---|
| Authors | <p>Only the first six should be listed, and followed by 'et al' as described in Reference fields.</p> <p>Note: when entering information in the Cochrane Register of Studies (CRS), it is preferable to enter as many authors as possible.</p> | <i>Citing Medicine</i> asks for all authors to be listed. |
| Date of publication | <p>When entering a date in Review Manager 5 (RevMan 5), include only the year of publication for most references types.</p> <p>Note: except for conference proceedings event dates, newspaper articles, websites, and correspondence.</p> <p>Note: when entering references in the Cochrane Register of Studies (CRS), month - and even day of publication - can be entered when available.</p> | <i>Citing Medicine</i> recommends including the month and day of the publication date. |
| | In Cochrane Reviews and protocols, only write '(in press)' without writing the expected date of publication. | When a study is in press, <i>Citing Medicine</i> recommends writing the publication date as 'forthcoming YYYY' where YYYY is the year of expected publication. |
| | If the article is an electronic publication ahead of print, add the date of electronic publication followed by '[Epub ahead of print]'. If the article is now fully published, do not add '[Epub ahead of print]' and simply enter the year the article was published. | For publications that are published, but were available online before publication (i.e. electronic publication (Epub)), <i>Citing Medicine</i> recommends writing both the date of electronic publication and the full date of publication. |
| City and country of publication | Write country names in full, except for countries listed in the table Common abbreviations that do not need to be defined (i.e. UK, USA). | <i>Citing Medicine</i> permits country names to be written in full (e.g. Germany), or international abbreviations to be used (e.g. DE). |
| Journal names | Journal names should always be written in full and selected from the journal pick list. | <i>Citing Medicine</i> asks for journal names to be written in the abbreviated form (e.g. Proc Natl Acad Sci USA). |

Formatting differences

There are some differences between the styles of Cochrane and *Citing Medicine*, due to software limitations, or to promote consistency across different reference types.

Useful sections in *Citing Medicine*

This table lists some useful sections in *Citing Medicine* that offer additional guidance.

| Topic | Summary of <i>Citing Medicine</i> guidance | <i>Citing Medicine</i> sections |
|--|---|--|
| Citing websites without titles | If no title can be determined, construct a title with the first words present on the page. | Chapter 25. Web sites. Box 15: Determining the title |
| Missing page numbers | In general for online journals, use the pagination written on the PDF article including any added letter (e.g. 1-18 or e34-7). For missing page numbers, count the average number of pages or screens, and place the number in square brackets followed by 'p.' (e.g. [3 p.]). | Chapter 23. Journals on the Internet. Location (Pagination) for Journal Articles on the Internet Chapter 23. Journals on the Internet. Box 54. No numbers appear on the pages of the article Chapter 25. Web sites. Box 83. No page numbers appear on the pages of the part |
| Journal with changing names (e.g. <i>British Medical Journal</i> to <i>BMJ</i>) | Use the name of the journal at the time of the first publication of the article cited (e.g. write ' <i>British Medical Journal</i> ' for a paper of 1983, but ' <i>BMJ</i> ' for a paper of 2013). Note: do not abbreviate the journal titles. See section on reference fields above and the general section on Reference fields . | Chapter 1. Journal Titles for Journal Articles |
| Ambiguities with names and surnames | Capitalize surnames according to how they appear in the original article cited. | Chapter 1. Journals. Author for Journal Title Chapter 1. Journals. Box 1. Surnames with hyphens and other punctuation in them Chapter 1. Journals. Box 3. Given names containing punctuation, a prefix, a preposition, or particle Chapter 1. Journals. Box 5. Designations of rank in a family, such as Jr and III |
| Citing references with errata or articles that have been retracted | Add the phrases 'Erratum in:', 'Erratum for:', 'Retraction in:', or 'Retraction of:', depending on the case, and follow it by 'Name of the journal YYYY; volume(issue):pages'. All this information should be entered in the 'Pages' reference field in RevMan 5. | Chapter 1. Journals. Box 58. Errata Chapter 1. Journals. Box 59. Retractions |

| | | |
|---|---|--|
| Discontinuous page numbering | Write the ranges of the pagination of the article, separated by a comma. If there are more than three ranges, follow the third page range by the mention 'passim' (e.g. '3, 6-8', but '1-3, 6, 8-15 passim'). | Chapter 1. Journals. Box 53. Discontinuous page numbers |
| Dates crossing months in conference proceedings | Write the date format as follows 'YYYY Month DD-Month DD' (e.g. '2014 February 23-March 2'). | Chapter 3. Conference publications. Box 24. Dates cross months |
