

## Methods (R26)

### Methods

	Standard	Rationale and elaboration	Resources
R26	<i>Reference protocol</i>	<b><i>Highly desirable</i></b>	
	Cite the protocol for the review.	The reader should be made aware that the review is based on a published protocol. This is particularly important if the review has been split into multiple reviews since the protocol was published. The most convenient place to reference the protocol for the review is under 'Other published versions of this review'. Since the protocol is usually no longer included in the CDSR once the review is published, it should be cited using the last publication citation for the protocol. Archived versions of protocols can be accessed via the current version of the review.
