

Cochrane Organisational Dashboard | Q2 (Apr-Jun) 2016

Overview

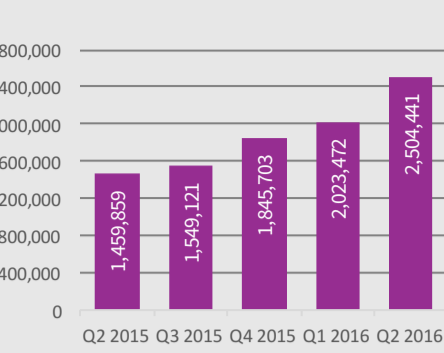

Commentary

- The 2015 Impact Factor for the Cochrane Database of Systematic Reviews (CDSR) is 6.103, increased from 6.035 in 2014.
- Traffic to the cochrane.org website continues to increase dramatically: up another 23% from Q1 2016 and 71% year on year (YOY).
- Surge in demand in Q2 for the Cochrane Library, up 46% YOY.
- Cochrane Library Q2 royalty revenues down YOY but up 7.5% on same six months in 2015
- Paper published in PLOS Medicine confirms that Cochrane Reviews are more transparent than non-Cochrane Reviews

Cochrane Library Usage

Cochrane.org Quarterly Usage

Key Finance Indicators

Key Target Achievements in Q2

- Following the CSG mid-year meeting structure and function reforms have become a higher priority. Detailed proposals were prepared and consultation process started with a series of webinars (14).
- The Cochrane Library rebuild project is progressing as planned with Wiley and Semantico, a specialist web platform company (10).
- Governance reform proposals completed and consultation opened in Q3, with final

decisions to be made in October at the AGM (17).

- The new Cochrane Crowd platform was successfully launched (6).
- The Global Evidence Summit was announced. This will take place in Cape Town in 2017 in place of Cochrane's usual colloquium (12).
- Changing priorities led to a reprioritisation of the 2016 Targets, with several targets moving to amber as delivery times lengthened into 2017.

Publishing Output

Reserves at end of Q2 2016

£6.1 million

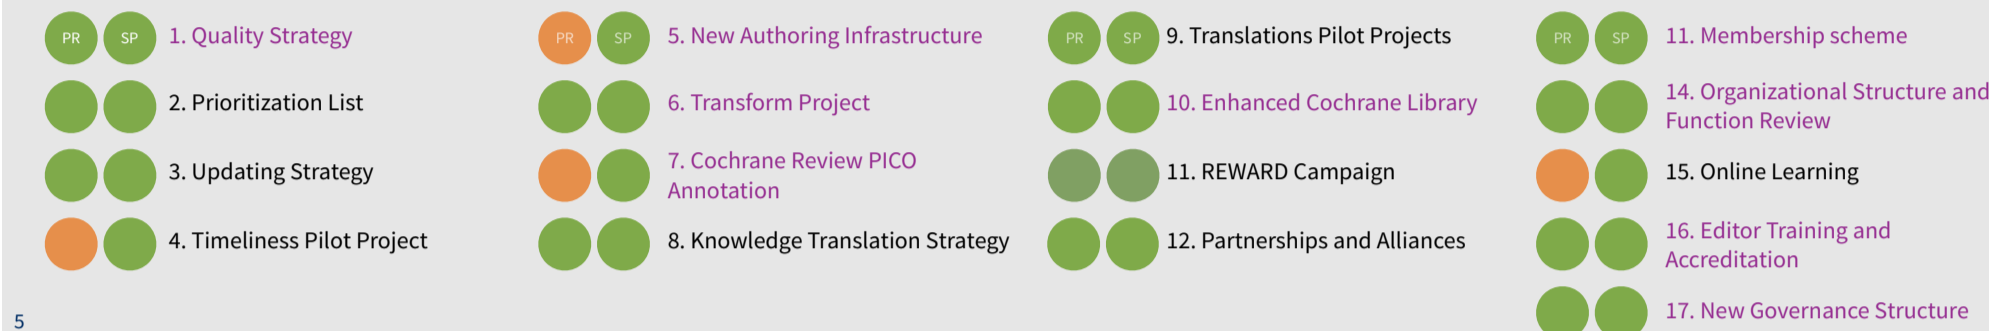

Income versus expenditure (YTD)

2016 Targets

Strategy to 2020 targets for 2015 – progress (PR) and spend (SP) (PURPLE: not started or N/A; RED: serious concerns; AMBER: some delays; GREEN: on target)

Targets in purple are the "mission critical" targets, which are the highest priority targets for 2016

Goal One

Quality

Reviews with Summary of Findings (SoF) Tables

As a comparison, 70% of new reviews published in 2015 had SoF tables.

- 12 New Reviews in Q2 (11%) contained no studies; 3 of these reviews had SoF tables.
- 5 Updated Reviews in Q2 (5%) contained no studies; none of these had SoF tables.

Output

Total records

	End Q2 2015	End Q2 2016	Change
CDSR Total	8,903	9,389	5%
Protocols	2,437	2,458	1%
Reviews	6,466	6,931	7%
CENTRAL	865,723	939,580	9%
DARE	36,795	36,795	0%
EED	17,397	17,397	0%
HTA	15,015	16,174	8%
Editorials	100	113	13%

Goal Two

Geographic Reach

Usage of cochrane.org website

Translation Activity

- 1,201 new & updated translations published in 13 languages
- 38 podcasts translated & recorded in 9 languages
- 68 blog shots translated in 5 languages

Goal Three

Social Media

Altmetrics

268	Paracetamol for low back pain
251	Yoga for asthma
184	Psychosocial interventions for self harm in adults
159	Acupuncture for the prevention of tension-type headache
139	Speech and language therapy for aphasia following stroke
128	Midwife-led continuity models versus other models of care for childbearing women
102	Acupuncture for the prevention of episodic migraine
97	Mobile phone based interventions for smoking cessation
93	Interventions to prevent misconduct and promote integrity in research and publication
82	Corticosteroids for managing tuberculous meningitis

Media

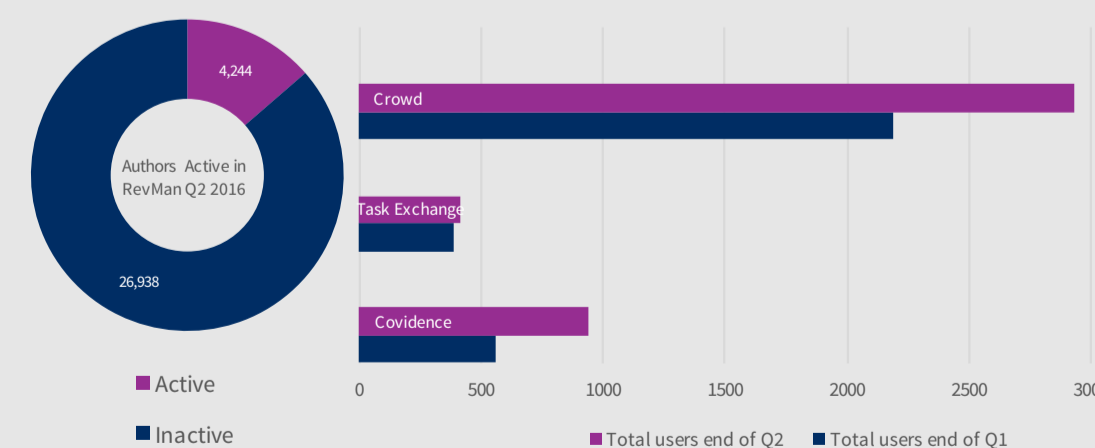

- 716 pieces of media coverage achieved globally
- 51 published Cochrane Reviews shared directly with named Science and Health Editors and international journalists.
- Cochrane Reviews were reported in international titles including the Gulf Daily News and The Straits Times, The Daily Mail, BuzzFeed, BMJ, Vox News, Men's Health and The Guardian.
- 2 Global Press Releases for published Cochrane Reviews: Yoga For Asthma, and Psychosocial interventions for self-harm in adults.

Goal Four

General interest: Cochrane Connect Subscribers

Active Contributors

Notes on the data

Commentary: PLOS medicine article by Page et al. is available at: <http://dx.doi.org/10.1371/journal.pmed.1002028>

- Access denied means a user tried to download a full text, but did not have a subscription to the Cochrane Library. Demand is the combination of successful full text downloads and attempted full text downloads (access denied). Data is for Q2 for each of the years shown.
- This is a measure of sessions of the cochrane.org website
- Change year on year: Reviews: no change; Updates: 20% decrease; protocols: 21% decrease.
- Income and expenditure figures are cumulative year to date (YTD), the 'Budgeted' lines are simply half of the annual figures, so do not represent anticipated quarterly fluctuations.
- Part of Target 15 around systems is on hold whilst we investigate whether it can be merged with the membership work, hence amber status.
- These data are based on all reviews and updates published in Q2 2016. We provide additional data around empty reviews as some authors choose not to produce SoF tables for such reviews.
- See note 3 above.
- DARE and EED are no longer being updated.

- The bar chart provides data for the top ten countries, which jointly accounted for 63% of sessions on cochrane.org. We also present two pie charts showing the split between English and non-English visitors to the site (based on the user's browser language).
- Green open access (OA) means reviews are made available after a 12 months embargo, Gold OA means reviews are available immediately. For details see: <http://www.cochranelibrary.com/help/open-access-options-for-the-cochrane-library.html>
- This is all activity in Q2 2016. Review translations are PLS and/or Abstract, not whole reviews.
- The graph shows Twitter "followers"; LinkedIn "group members"; Facebook "group members".
- Scores shown are the Altmetric scores for reviews published in the previous quarter. As a reference point in Q1 2015 the highest score was 310 for e-cigarettes review.
-
- As part of the implementation of Cochrane membership we should see an increase in subscribers to Cochrane Connect as a proxy for interested people engaging with Cochrane.
- RevMan: proportion of contributors logging in to work in Q2; bar charts: total user base currently for these other tools. Covidence users is limited to Covidence users working on Cochrane reviews.
