

# Cochrane Organisational Dashboard | Q3 (Jul-Sep) 2017

## Overview

### Commentary & Achievements

- Cochrane South Africa successfully hosted the Global Evidence Summit (GES) in Cape Town in September with four other organizations. Over 1,300 delegates from 75 countries attended.
- Cochrane's new Membership scheme was launched at the GES, and the rollout for existing collaborators will continue in Q4.
- The new Cochrane Africa Network was launched at the GES, and new Centres in Argentina and Chile were approved by the Governing Board.
- The new Cochrane Library was given a 'soft launch' in September, allowing selected users to test and feedback on the new platform and features, giving us increased confidence in achieving a launch this year.
- Cochrane Interactive Learning, our new systematic review online learning tool, was launched in September with free trial usage available until early November. It is complemented by the launch of Cochrane Classmate, a new tool to support the teaching of evidence production in classrooms around the world.
- Involving People, a learning resource for systematic review editors and authors to help them get patients and other members of the public involved in the production of their reviews was also launched at the GES.

### Cochrane Library Usage

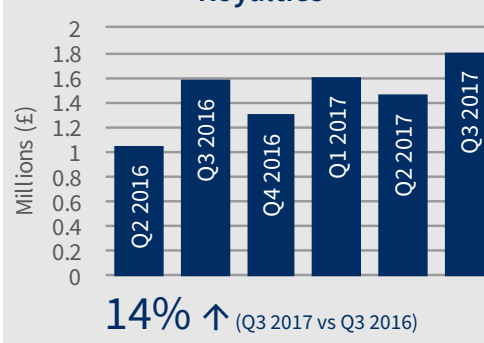

- Demand for the Cochrane Library continues to be strong with 13% growth year on year (YOY)
- Sales of the Cochrane Library continued its significant growth in 2017 with a 14% increase in royalties for Q3 compared with Q3 2016.
- The Governing Board approved implementation plans for the Cochrane Review Group Transformation Programme, which will begin in Q4 2017; and the Cochrane Knowledge Translation Strategy, that will begin implementation in 2018.
- Cochrane.org usage also grew, though at a lower rate than in earlier quarters. Mexico remains the leading user of cochrane.org, with substantial growth across South and Central America.

### Cochrane.org Quarterly Usage

### Royalties

### Publishing Output

### Income and expenditure (YTD)

**Reserves at end of Q3 2017**  
£5.175 million

## 2017 Targets

### Strategy to 2020 Targets for 2017

PURPLE: not started or N/A; RED: serious concerns; AMBER: some delays; GREEN: on target

- Complete the development of RevMan Web and begin phased implementation for Cochrane Reviews
- Complete the Transform project
- Complete the delivery of a programme of training and accreditation for editors
- Improve the process of producing translations to make it easier for Cochrane translators and editors
- Define an organization-wide framework for knowledge translation activities
- Complete the first-phase delivery of an enhanced Cochrane Library in English and Spanish
- Host a successful Global Evidence Summit
- Begin implementation of the approved Cochrane Review Group transformation programme, and finalize remaining proposals for organizational Structure & Function reforms
- Launch a Cochrane membership scheme
- Complete implementation of the approved governance reforms

## Goal One

### Quality

#### Reviews with Summary of Findings (SoF) Tables

As a comparison, 70% of new reviews published in 2015 had SoF tables.

### Output

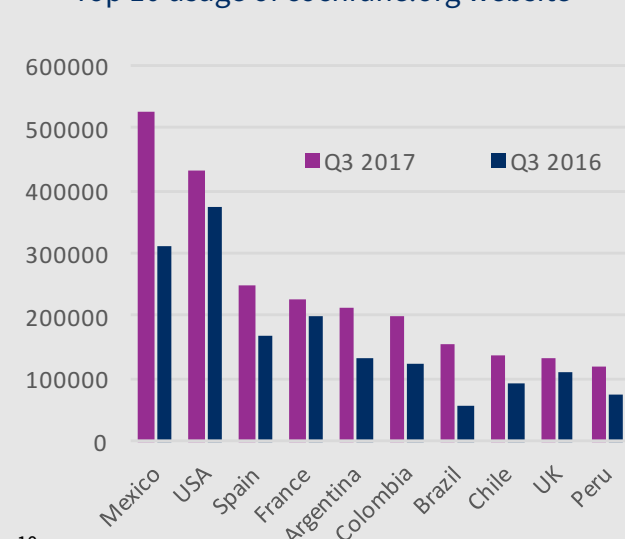

### Total records

	Q3 2016	Q3 2017	Change
CDSR Total	9,558	9,987	4%
Reviews	7,038	7,514	6%
Protocols	2,520	2,473	-2%
CENTRAL	964,387	1,087,170	11%
DARE	36,795	36,795	0%
EED	17,397	17,397	0%
HTA	16,372	16,372	0%
Editorials	117	119	2%

## Goal Two

### Geographic Reach

#### Top 10 usage of cochrane.org website

### Non-English Access (cochrane.org)

### Translation Activity

- 1,201 new & updated translations published in 15 languages
- 47 podcasts translated & recorded in 8 languages
- 39 blog shots translated in 5 languages

### Open Access

- 205 Reviews made available as Green Open Access in Q3 2017
- 8 Reviews published as Gold Open Access in Q3 2017
- 3,386 Reviews in total available open access at end of Q1 2017

### Access to Translated Content (cochrane.org)

## Goal Three

### Social Media

### Altmetrics

- 590 Whole grain cereals for the primary or secondary prevention of cardiovascular disease
- 240 Continuous support for women during childbirth
- 160 Non-invasive ventilation for the management of acute hypercapnic respiratory failure due to exacerbation of chronic obstructive pulmonary disease
- 104 Interventions for increasing fruit and vegetable consumption in children aged five years and under
- 88 Comprehensive geriatric assessment for older adults admitted to hospital
- 78 Interventions to improve hand hygiene compliance in patient care

By comparison, top scores in each quarter in 2016 were:  
 Q1 2016: 927 Workplace interventions for reducing sitting at work  
 Q2 2016: 268 Paracetamol for low back pain  
 Q3 2016: 638 Vitamin D for the management of asthma

### Media Reach and Impact

- 2,377 pieces of global media coverage in all languages
- 2,067 pieces of global media coverage in English language (compared with 1,501 in Q3 2016)
- No global press releases were undertaken in Q3. Instead the focus was on targeted dissemination of 11 key reviews to media contacts.
- One key highlight of the quarter was the review: *Welfare to work interventions and their effects on the mental and physical health of lone parents and their children*. The University of Glasgow led on PR efforts around this review, leading with an exclusive in *The Sunday Times*. UK

## Goal Four

### Cochrane Learning Live

### Active Contributors

- RevMan (active authors): 6,124 ↑ 8% YOY
- Cochrane Crowd (total members): 7,000 ↑ 108% YOY
- TaskExchange (total users): 1,380 ↑ 110% YOY
- Covidence (total Cochrane users): 2,272 ↑ 107% YOY

### General interest: Cochrane Connect Subscribers

## Notes on the data

- Access denied means a user tried to download a full text, but did not have a subscription to the Cochrane Library. Demand is the combination of successful full text views and attempted full text views (access denied). Data is for Q3 for each of the years shown and excludes usage of Biblioteca Cochrane Plus.
- This is a measure of sessions of the cochrane.org website
- Compared with Q3 2016: Reviews: 20% ↓; Updates: 10% ↓; Protocols: 6% ↑.
- 14% increase is comparing Q3 2017 with Q3 2016. Currency fluctuation has had a positive result on income.
- The figures presented for income and expenditure are year to date i.e. January to September.
- Most targets are on course with the exception of the Cochrane Library target which we have reported separately as being red. The RevMan web target is delayed due to resources being spent on the Cochrane Library project and membership.
- These data are based on all reviews and updates published in Q3 2017. Of the 26 reviews or updates without SoF tables, 20 had no included studies. 7 out of the 26 reviews without SoF were overviews, which do not have an establish SoF format and one out of the 26 was a methodology review.
- Cumulative year to date compared with previous year: Reviews: 5% ↓; Updates: 10% ↓; Protocols: 4% ↓.
- DARE and EED are no longer being updated.
- The bar chart provides data for the top ten countries. Mexico has replaced USA as number 1 for the first time in Q2 2017. Also Australia and Canada have fallen out of the top 10 as more South American countries enter the top 10 list.
- The English / non-English split is based on the user's browser language.
- This is activity in Q3 2017. Review translations are PLS and/or Abstract, not whole reviews.
- Green open access (OA) means reviews are made available after a 12 months embargo, Gold OA means reviews are available immediately. For details see: <http://www.cochranelibrary.com/help/open-access-options-for-the-cochrane-library.html>
- This data is based on the language of the web page, so shows the usage of our translated content.
- The graph shows Twitter "followers"; LinkedIn "group members"; Facebook "group members".
- Scores shown are the Altmetric scores for reviews published in the previous quarter.
- As of Q1 2017 we have a new media tracking service that can track media uptake across all languages. Comparative data is limited to English language media hits due to the 2016 legacy data.
- These are webinars delivered as part of Cochrane Learning Live. We do not have quarter by quarter data for webinar views in 2016, so there is no directly comparative data currently. The cumulative count of views is for all webinars in the series, some of which have had over a year to build up their view count. The top webinar is an introduction to Covidence at over 12,000 views, and the second most watched is a webinar on use of GradePro GDT in Cochrane reviews at around 6,000 views.
- Percentage increase is comparison with Q3 2016.
- As part of the implementation of Cochrane membership we should see an increase in subscribers to Cochrane Connect as a proxy for interested people engaging with Cochrane. In Dec 2016 we introduced some design improvements to make Cochrane Connect sign up more visible.
