Interim Chief Executive Officer’s Report

Judith Brodie
27th October 2021
1. A transformation agenda and the *Strategy for Change*
2. Achieving sustainability and resilience through re-organization
Cochrane is brilliant and crucial

“Every great dream begins with a dreamer. Always remember, you have within you the strength, the patience, and the passion to reach for the stars to change the world.”

*Harriet Tubman*

“Change is the law of life, and those who look only to the past and present are certain to miss the future”

*John F. Kennedy*

“The measure of intelligence is the ability to change”

*Albert Einstein*
The transformation agenda

• Introduction of the *Strategy for Change*

• A *Review and Re-organization* across Cochrane to **reduce costs** and inefficiencies, and seek new and **more streamlined ways of working**, to include:
  
  – Substantial work on improving editorial & publishing systems and processes – the ‘future of evidence synthesis’ in Cochrane
  – Consideration of how we achieve an Open Access future
  – A review & restructure of evidence production; and the Central Executive Team

• Investment in organizational **fundraising** to grow and diversify our income and increase sustainability
How will we transform?

By focusing on changes the organization needs to make *in the next couple of years* to remain sustainable *in the long-term*

And maintaining commitment to the key principles of:

<table>
<thead>
<tr>
<th>COLLABORATION</th>
<th>RELEVANCE</th>
<th>INTEGRITY</th>
<th>QUALITY</th>

</tbody>
</table>

COLLABORATION

RELEVANCE

INTEGRITY

QUALITY

- Underpins everything we do locally and globally
- The right evidence at the right time in the right format
- Independent and transparent
- Reviewing and improving what we do, maintaining rigour and trust
Ambitions for 2021-2023 defined in the **Strategy for Change**: 

Consultation with the Cochrane Community through 2020 on strategic priorities
### Strategy for Change: 2021-2023

**Our Vision**

> Our vision is a world of better health for all people where decisions about health and care are informed by high-quality evidence

**Our Mission**

> We are an independent, diverse, global organization that collaborates to produce trusted synthesized evidence, make it accessible to all, and advocate for its use

<table>
<thead>
<tr>
<th>Key Principles</th>
<th>Collaboration</th>
<th>Relevance</th>
<th>Integrity</th>
<th>Quality</th>

<td>Underpins everything we do locally and globally</td>
<td>The right evidence at the right time in the right format</td>
<td>Independent and transparent</td>
<td>Reviewing and improving what we do, maintaining rigour and trust</td>
<td></td>
</tr>
</tbody>
</table>

**Our Goals**

**GOAL 1:** Producing trusted evidence

To produce trusted and timely synthesized evidence addressing the most important questions for health and care decision making

**GOAL 2:** Advocating for evidence

To be a leading global advocate for evidence-informed health and care

**GOAL 3:** Informing health and care decisions

To inform health and care decisions by making our evidence accessible, usable, and available to all

**Objectives for Change**

We will deliver Goal 1 by:
1. Delivering timely, high quality responses to priority global health and care questions, which the users of our evidence help define
2. Streamlining production of reviews and simplifying editorial systems and processes

We will deliver Goal 2 by:
3. Advocating for evidence-informed decision-making and integrity in research, including by pursuing high-impact partnerships and activities

We will deliver Goal 3 by:
4. Making all Cochrane Reviews Open Access by 2025 at the latest without placing the financial burden on review authors
5. Improving user experience by increasing the accessibility and usability of our products

**Enabling Objectives**

Our Objectives for Change will be enabled by:

**Improved efficiency**

Reducing editorial and production complexities, and simplifying organizational structures to support the global collaboration that is key to Cochrane’s work

**Sustainability**

Realizing our Open Access ambitions by moving towards a new organizational business model that reflects expanded fundraising and delivers long-term sustainability for the whole organization

**Increased awareness and impact**

Increasing the visibility and profile of Cochrane globally; demonstrating our value and impact to decision-makers and funders; and meeting the needs of future generations

**Enhanced accountability**

Strengthening communications and engagement with Cochrane members, supporters, staff and beneficiaries; Improving diversity and inclusion; and making a commitment through the evidence we produce and how we collaborate to addressing global health and care priorities and reducing health inequities

*Approved by Cochrane Governing Board, June 2021*
Highlights in delivering our goals 2020-21

GOAL 1: Producing trusted evidence
- Fantastic, collaborative response to COVID-19
- Shaping together the future of evidence production
- A focus on editorial integrity and independence
- Citizen scientists identifying relevant studies for inclusion in reviews in weekly Cochrane Crowd challenges

GOAL 2: Advocating for evidence
- Cochrane Convenes: learning from COVID & looking forward
- Strong partnership with World Health Organization (WHO)
- Partner in World Evidence-based Healthcare day, calling on individuals and organizations round the world to take action
Highlights in delivering our goals 2020-21

GOAL 3: Informing health and care decisions
• Re-commitment to Open Access by 2025
• Plain Language Summary Project: to see whether a team of professional writers could improve the quality, consistency, and translatability of Cochrane PLSs. The project has produced a template for writing PLSs. We would like as many people as possible to test it and tell us what they think about it – see community.cochrane.org.

And many more achievements - as you will hear today
1. A transformation agenda and the *Strategy for Change*
2. Achieving sustainability and resilience through re-organization
An organization-wide review and re-organization to address a number of challenges

**Financial**

- Commitment to Open Access, which will significantly affect the Charity’s income from 2025
- Cochrane Group income is also less secure
- The Charity has been spending down reserves as planned, but we need to reduce that spending to remain sustainable
- We need to diversify our income through investing in fundraising and product development

**Efficiency and impact**

- Significant and organic growth of Cochrane has resulted in complexity and inefficiencies
- COVID has demonstrated the value and importance of fast responses to health challenges – we need to streamline review production to make this possible
- We need to look to what the future could be for information and evidence - and anticipate and adapt
- We have to be clear on our priorities and focus on the right things
- Increased competition and need to fundraise => even more important to demonstrate our value and impact
The focus of review and re-organization

**Members & Supporters**
- Continue to support growth
- Focus on improving diversity and inclusion

**Cochrane Groups**
- Focus first on changes to Cochrane Review Groups & Networks (evidence production) before addressing other Group-types

**Central Executive Team (Charity staff)**
- Simplification of structure
- Reduction in costs and staff
- Investment in capacity for fundraising
There will be fewer Cochrane Groups in the future. The major funder of UK-based Cochrane Review Groups, the National Institute of Health Research (NIHR), will cease funding in its current form by 2023. Other Group funders worldwide are indicating similar plans. Many Group staff will lose their current roles with Cochrane.

Although Cochrane does not employ staff of Groups, we recognize this loss. We will do what we can to support people through change.

There is also change for the Central Executive Team, which will be reduced in size.
Central Executive Team restructure

Over £2million GBP saved for 2022, rising to £2.7million GBP in 2023 (staff and non-staff savings)

- July – process launched, led by senior management, supported by advisory consultants
- August – consultations with staff, Governing Board and advisors
- September – proposal approved by Board to be shared with staff for consultation and feedback
- October/November - implementation
• Editor in Chief reports to Co-chairs
• Executive leadership team of 5
• Editor in Chief leads Evidence Production and Methods, with strong oversight of Publishing and Technology
What impact will the CET restructure have on the Cochrane community?

• The new Development Director and Directorate will lead the development of a **global fundraising strategy** with the aim of increasing funding for Cochrane, engaging and supporting all parts of the community.

• Advocacy, communications, and **Engagement, Learning & Support** present an opportunity to **strengthen internal communications and collaboration**.

• The **future of evidence synthesis** change programme may lead to further changes in structures or functions.

• Reduction in central Knowledge Translation capacity, but a new Communications Manager role has a remit to promote Knowledge Translation (KT) across Cochrane in line with the current KT strategy, ensuring it is embedded and integrated; and supporting local strategies and activities. **Everyone has a role in KT**, promoting the use and uptake of evidence in policy and practice.

• Support to the language translation teams remains.
More about fundraising

- A global approach – engaging the community to increase global funding for Cochrane’s work
- In line with our Conflict of Interest policies
- A strategic priority: a Director-level appointment in the Central Executive Team
- This Director will lead organizational culture change as we adapt to access new sources of funding. It will require Cochrane to develop a much greater focus on its impact
- Consortia and partnerships with other organizations who share our values will maximise opportunities from major funders
- There are real prospects for success (having commissioned a review of potential funders)
- Need to invest now – returns will flow in 2-4 years

“Fundraising or fund-raising is the process of seeking and gathering voluntary financial contributions by engaging individuals, businesses, charitable foundations, or governmental agencies”

Wikipedia, 2021
Culture and ways of working: CET focus for 2022

Likely to include:

- **Strengthening community** communications, engagement and collaboration
- Becoming more **enterprising and entrepreneurial**, and fundraising oriented
- Better understanding of **costs, value, impact** and contribution of activities
- Becoming more **flexible and adaptive** to change
- Ensuring the culture allows and encourages **debate, feedback and engagement**
- Ensure the new structure works well, adapting if needs be, and promoting **cross-team working**
- Focussing on how we become a **diverse, happy, healthy and productive** workforce
- Establishing **new ways to connect** and meet in the context of a (mainly) virtual office

- The Consumer Network and Council will initiate the process to develop our community values
Thank you!
