- 12% of responses utilised the caption facility.

Did you experience any technical difficulties/connection issues?

- 73% of responses did not have any technical issues.
- 26% of responses had minor or user specific technical issues.

Improvement Comments:

- Include more polling questions.
- More sessions and speakers from the community - important to hear about Groups and their work with partnerships and KT.
- If audience get reference literature on the topic of discussions.
- Video chat is too short to build up a rapport.
- Allow 5 minutes for people to get coffee, go to the loo etc, between end of the presentations and start of the networking?
