The select the Tracking pull-out and find your review using the type-ahead search.

Then drag your results (the whole folder or the selection of records) onto the review.

This box will pop-up showing a summary of the records sent. Select Send to author.

It will take you direct to the Tracking tab. Select Send to Author.

On the pull-out panel you have the option to send to Covidence. Select this option and fill in the remaining details.

An email will be sent to the recipient telling them that their results are available in Covidence.

They (or you) will then be able to go to the review in Covidence and select import and there will be the option to Import from CRS, which will pull the references you sent.
