

In CRS you can choose how to view and display records in the table view. The double triangle symbol at the top of each column can be used to sort the records. Column widths can also be changed by dragging the border line between columns.

The screenshot shows the Cochrane Register of Studies interface. At the top, there are navigation tabs: Dashboard, Records, Duplicates, CENTRAL, Import, Tracking, Journals, CTGOV, Reports. On the right, there is a search bar with 'DEMENTIA' and a settings icon. Below the navigation is a toolbar with options like Deduplication, New reference, New study, New record, Ideas, Users, and Help. The main area displays a table of records from 'ALOIS August September 2018.txt'. The table has columns for #, Author, title, CRSD ID, and Abstract. The 'Author' and 'title' columns have double triangle sort symbols at the top, which are circled in red. Below the table is a 'Reference record' panel for the selected record. This panel shows the 'Field' and 'Record value' for 'Title', 'Author', and 'Year of publication'.
